## GCX Launches New Support Arm for Tablets

*The VHM-T is designed for easier and more ergonomic tablet use in healthcare settings*

PETALUMA, CA (Aug. 29, 2018) – Patients now have a new option to safely view apps and online content using tablets with the launch of the GCX VHM-T variable height arm. This latest addition to the growing fleet of GCX mounting solutions provides exceptional cable management and a wide range of safe viewing angles to improve patient engagement at the point of care.

“As a manufacturer that designs mounting solutions exclusively for medical environments, our newest arm meets a growing need for medical communities wanting to best leverage the popularity of tablets to improve their patients’ experiences,” said Cris Daugbjerg, GCX Vice President of Development and Sales. “Having a securely-mounted tablet allows healthcare organizations to safely provide their patients with access to apps and online content that contribute to the quality of care.”

The [GCX VHM-T variable height arm](#) works with tablets made by Apple®, Microsoft®, Samsung® and others. It features exceptional cable management with 100% concealment for two cables, along with easy access should cables need to be updated or replaced. The arm comes with parallel linkage, so a tablet maintains a constant viewing angle throughout its range of motion. All movement points are pre-set from the factory to allow quick setup and little to no maintenance.

Among the new arm’s core features and benefits:

- **Unparalleled precision, ease of movement and adjustability** so the arm moves readily and smoothly into place at every point within its full range of motion for optimal positioning and viewing.
- **Outstanding cable management** for easier cleaning, provides simple access for service, and creates a professional-looking solution.
- **Medical-grade for maximum cleanability and durability** to withstand constant use and harsh cleaning regimens typically used in healthcare facilities for infection control.

The GCX VHM-T is part of the company’s [growing patient engagement-focused product line](#) manufactured under its ISO 13485 certified quality system. This arm and other solutions, like the award-winning Patient Engagement Table, can improve patient outcomes and satisfaction rates. By better enabling tablet access, clinicians can provide apps to educate, connect and entertain patients during outpatient visits and hospitalizations. For more information or to place an order for the VHM-T, visit the GCX website at [www.gcx.com](http://www.gcx.com) or contact Kevin Merritt, Director of Marketing, at (800) 228-2555, Ext. 713.
